Congratulations!

Your store just bought one of the finest Architectural Williamsburg fixtures available worldwide. Please take a few moments to read these wiring and assembly instructions. It will help you assemble this fixture properly and make sure that your customer will be as satisfied with this purchase as you are.

Before you start:

1. Make sure that you have all the parts according to the parts list.
2. Get a dry piece of cloth to set the brass parts on. This will help you avoid scratching the brass parts and prevent the fixture from tarnishing.

To start:

Take the center column apart, starting from the bottom finial, all the way to the top center body, which holds the top arms.

Please set the parts on the cloth in the order they come off the center column. That way you will know how to put them back on again.

Wiring Instructions:

The fixture should be wired as shown in the attached wiring diagram. One of the two 12 ft. wire cords (wire cord A) is connected to all lights in Tier 1, while the second 12 ft. wire cord (wire cord B) is connected to all the lights in Tier 3. The connection between Tier 1 and Tier 2 is made through the 3 ft. wire cord (jumper wire C).

The copper ground wire is attached to the ground connector within the center body of the top tier.

# ASSEMBLY INSTRUCTIONS FOR

## Architectural Williamsburg

### 3104/16+8+4

---

Assembly Instructions:

It is best to assemble the fixture starting at the top and then to proceed to the bottom.

Note: Pull all wires (A and B, as well as the ground wire) through the top pipe of the column before you start assembling the top arms.

Note: Before you connect the wires of Tier 1 to wire cord A, make sure that Jumper Wire C, which makes the connection between Tier 1 and Tier 2, is also connected.

Before you put the middle and bottom tier on, hang the fixture with all the weight on the chain. That way you avoid any undue force on the center column brass pieces and it is easier to assemble these fixtures this way.

This is truly a magnificent fixture and we hope that you and your customers enjoy it for many years to come.
