Congratulations, you have just purchased the leading-edge dimming technology from Holtkötter International, Inc. Our "Dimm-System Punkt 1" (Dimming System Point 1 (*P1)) is specifically designed to provide specialized features for ease and convenience of use.

Features of "Dimm System Punkt 1" include:

Point Dimming - turn the lamp on with a single click of the P1 dimmer.

Soft On - the lamp comes on low and continues to brighten to full brightness. This allows the eye to adjust to a gradual increase in light.

Soft / Delayed Off - turn the lamp off with a single click of the P1 dimmer. The lamp dims to 60% brightness of the original setting, remaining briefly at that level to allow you to exit the room; then the lamp gradually turns itself off. This "soft" off provides a few moments of light after turning the lamp off, rather than immediate darkness as is the case with other switches.

Dimming Cycle - to adjust the lamp to the perfect light level for any situation, press and hold the P1 dimmer. The dimmer will cycle through all dimming levels. When the lamp achieves the light level of your choice, release the P1 dimmer.

No assembly is required.

Care Instructions

Use only a soft, dry cloth to clean. If necessary, a slightly damp, soft cloth can be used to spot clean. Do not use common household cleaners on lamps or fixtures, as the lacquer on the outside of the brass may be damaged as a result. Enjoy your new Holtkötter lamp.
